

Busche Workholding excels in the design and building of fixtures for critical parts used in the automotive, aerospace, industrial equipment, agriculture and construction industries. Busche Workholding is proud that we have been selected by leaders in the machining industry such as Makino, Okuma, Okk, Mori Seki, and Heller Machine to provide quality fixturing. Manufacturers such as Dana, Ryobi, Madison Precision, Aisin Automotive, Asama, West Irving Die-Casting, Metaldyne, Honeywell Aircraft and Magna Powertrain are among a few of the companies that have selected Busche Workholding to provide innovative, highly productive fixturing to meet the demands of their production commitments.

Busche Workholding is a certified Okuma North American pallet distributor.

400 millimeter to 1000 millimeter pallets

Busche Workholding is a master distributor for Samchully Chucks.

BUSCHE WORKHOLDING

**Custom-Made Tombstones
for the Machining Industry**

Since 1996, Busche Workholding has been an industry leader in the design and manufacture of hydraulic fixtures, commonly referred to as "tombstones."

Don't wait a lifetime for your tombstone.

BUSCHE

BUSCHE WORKHOLDING

Busche Workholding, an ISO certified facility, specializes in hydraulic workholding fixtures from start to finish. Our objective is to lower manufacturing costs equating to higher profits for our customers. We support you throughout the project no matter where your business is located. Workholding's engineers use the latest design and MasterCam software to create prints and manufacture precise fixtures. Gun drilling, CMM verification and other critical processes are all performed in house, allowing us to be more aggressive on delivery dates, as well as, control the flow process to meet and beat our customer's demands. Busche Workholding understands how critical it is that our fixturing and tooling arrives on time and works satisfactorily from the start.

With Busche Workholding's team of in-house designers, master machinists, and proven supply chain network, no project is too large or complex. Lead times for complete fixtures can be as little as six to eight weeks.

Simplify project management with the seamless integration of custom workholding solutions and functional gaging packages offered by Busche Workholding. Busche Workholding's experience in both disciplines, combined with modern equipment and processes allow for competitive pricing, unmatched customer service, and unparalleled speed to market.

Welcome to Workholding's newest concept in tombstone design.

The quick-change tombstone and adapter plates are created for multi-change over machines producing low volume production runs. This design reduces the need for a complete tombstone - lowering tooling cost, while increasing efficiency on change overs up to 75% and condensing storage requirements.

Engineering & Design Services

Busche Workholding's commitment to advanced technology is not isolated to the shop floor, it's a key component of the design process. Using the latest version of AutoCad Inventor and SolidWorks, designs move quickly from concept to finished detailing in industry leading time frames. Net meetings save time and expenses by expediting the approval process.

Custom Workholding Solutions

Whether it is 4th or 5th Axis, Horizontal or Vertical, Busche's custom fixture designs will provide the best solution for your needs.

When it comes to workholding solutions, Busche is an industry leader in customer service. We pride ourselves in our innovative spirit. Our entire staff is focused on building a custom fixture that saves you time and money. That's why we have customers around the globe who come back to us time and again.
